VERIZON PAPER

Hi I am Suneel Dixit I got selected in Verizon Data Services. I am providing the full selected procedure details

Initially they call for Written examination. They normally ask 75 questions out of which 65 questions are of aptitude type and rest 10 are from C and Data Structures. What i beleive anyone should attempt around 90% of the questions. C part is most important to clear. There is no negative Marking

When u clear written examination they call for technical interview. In Technical Interview they query about the fnal year projec which u have developed sometimes they ask about coding and puzzles also. Prepare C and Data Structures well to crack the interview. but if ur projec is from different domain then prepare accourding to it. Interview round will last for around 30minutes to 1 hour. Beleive me its not too tough to crack it

But remember one thing if ur selelected in one comp then dont mention it . It may prove disastrous for u .
after technical interview if ur thru then they let u to the HR Round . HR is just a formality Once technical is clear it means u r at Verizon. HR will simply handover a bag to u as a gift from Verizon.
