

VERIZON PAPER ON 22nd APRIL AT NEW DELHI

Dear Friends,

Here I am Atul presenting you the placement paper of Verizon conducted by Merittrac(The same company that conducts test for Flextronics). So go through the Flextronics Paper also for the preparations as the pattern is same.

There were four sections:

1. Verbal
2. Aptitude
3. Mental Ability
4. C & Data Structures

In verbal you better prepare from the GRE Barron,s 14th Edition starting questions of Fill in the blanks section.Also practice High Frequency Words of barron.The mostly questions are based on you grammer practice i.e. questions related to use of ARTICLES(a,an,the).There is also a passage reading section.Don,t experiment there at all if you know nothing then just follow what you usually use to speak in your common language or dialy speaking language.

In aptitude section just do the R.S. Aggarwal,s Quantative Aptitude questions.Also practice puzzles of Shakuntala Devi. These would be a positive and confidence building for you.That would definitely make paper easy for you.

In mental ability you need not do any practice as it would be the easiest part of the paper.Just do the questions related to change of signs i.e if we replace * by -, / by + etc type questions that would make paper more easier and you can score much more marks in that paper.

In C & Data Structures you must practice just the algorithms for Binary Search, Link list etc. to implement.Also remember that only part that would be harder in this test would be C. So concentrate over the pointers concept.

You will definitely succeed as the time would be sufficient if you attempt paper with consistent speed.They will provide you sufficient time for C & Data Structure section.

Wish you all the Best.
