

SATYAM

hi guys,

satyam conducted campus interviews on 12 of this month. They have selected 14 students from our college. And the good news is that i am also among those 14. It has been only 2 months since i joined this group and i have made it to satyam i whole heartedly thank chetana madam and suri sir for their magnificent vision. i would like to thank all the people in this group for their priceless support all the best guys i hope every one of u gets a job.

i am including all the experience of mine on that very special day of my life so that i can be of immense help to you.

total appeared :250

qualified in written:60

qualified in gd :31

no got selected :14

first there was a written test 15 questions and 30 minutes. i do not remember all the questions but here are some.

1. if a wheel makes 560 revolutions and completes 1.1 km what is the radius of the wheel.

2. in how many ways can we arrange 20 people such that only 1 candidate should be between 1 and 20.

3. in how many ways can you make the first move in chess game.

4. if balu has three varieties of rice 24, 20, 30 rs respectively if sells a mixture of rice which contained 2 kg of third quality for 30 rs and a profit of 20% then what amount of the first quality was mixed.

5. in a club women always outnumbered men by 16, some times the women are 9 times men by 32 what is the no of women sometimes.

(answer was none of these).

6. there were three blood relationship problems (so prepare for them)

7. remaining were comprehensive passages and only one question was asked from each passage.

then there 60 or 61 members were selected for the GD

each group had 8 members each and a topic of their choice was given.

my topic was

1. future of IT in india (my topic)

2. population explosion (others)

3. is movies fans association necessary.

there was a very tough competition there but i and another guy made it comfortably we were the only two who got selected in the group

then there was a personal interview

two people were sitting one was HR and other was a technical person

both of them were cool and amazing guys there were very friendly and down to earth kind of they maintained very low profiles and were never proudish.

1. how is data stored in oracle

2. is jvm platform independent.

3. what is method overriding

4. what do you know about 8085 microprocessor.

5. security level of windows NT

hr questions

1. tell about yourself.

2. i am staying at begumpet guide me to your house.

3.why is there a decline in the percentage since 10 standard.

thats it then the results were announce after 2 hrs and it was celebration time to me hope you too get selected in many of the mncs .
